

Crossing Biological Barriers with Nanomedicines

29th April/24th June/29th July/30th September/28th October/25th November @ 13.00-14.00

VIRTUAL PRESENTATIONS - FREE TO APS MEMBERS - £10 Per event for Non Members plus VAT.

Overview

The APS is pleased to announce this special series: the focal point is the use of nanomedicine to overcome biological barriers to drug delivery. The meetings will be standard lectures with plenty of opportunities for discussions; fireside chats and flash presentations. These meetings bring together expert speakers from academia and industry.

Who should attend

This meeting series is ideally suited for PhD candidates, academics, industrialists and regulatory personnel. Overall, the content of this special series has been carefully crafted to complement the existing APS meeting portfolio, and it seeks to address a critical knowledge gap within the UK and beyond. **Click here for more:** <https://apsgb.co.uk/event/virtual-webinar-series-nanomedicines-crossing-biological-barriers-with-nanomedicines/>

Introducing our guest speakers

29th April 2021
Prof Giuseppe Battaglia (UCL)
Phenotypic nanomedicines: integrating personalised medicine into drug delivery.

30th September
Prof Stefaan De Smedt (Ghent University)
Cytosolic Delivery of Bio-Therapeutics.

24th June 2021
Dr Marianne Ashford (AZ)
Nanomedicines to enable innovative medicines, & Fireside chat.

28th October
Speakers selected from abstracts
Four Flash Presentations.

29th July 2021
Dr Eric Mayes (Endomag Ltd)
Taking a nanoparticle medical product into the global market.

25th November
Dr. Asha Patel (Imperial College London)
Developing mRNA therapeutics for chronic disease, & Fireside Chat.
